At the moment I am in **London Metropolitan University**. I am on the **Computer Science** undergraduate course full time.

Overview of my Computer Science course:

This course provides you with the theoretical and practical knowledge and skills required for a professional career in computing. The course examines the specification, design, implementation and testing of software packages, languages and systems to professional standards and within a code of ethics. The course is designed for those who want to work as software engineers, programmers, IT professionals or analysts.

More information about what I'm studying at the moment here: <http://www.londonmet.ac.uk/ug-prospectus/courses-11-12/computer-science.cfm>
